Crosby® A-350N Choker Hook with Latch

Product Information

- ☑ The A350N hooks incorporate Crosby's patented QUIC-CHECK® marks.

Each hook utilizes ***“Throat Deformation Indicator”*** markings forged into the product.

QUIC-CHECK

Crosby® A-350N Choker Hook with Latch

Product Information

Deformation Indicators -- Two strategically placed marks, one just below the eye and the other on the hook up, which allows for a **QUIC-CHECK®** measurement to determine if the throat opening has changed, thus indicating abuse or overload.

Crosby® A-350N Choker Hook with Latch

Product Information

Deformation Indicators -- To check, use a measuring device (i.e. tape measure) to measure the distance between the marks.

- The marks should align to either an inch or half-inch increment on the measuring device.
- If the measurement does not meet this criteria, the hook should be inspected further for possible damage.
