

HL13

RESCUE BOAT HOOK TYPE HL13

TECHNICAL CHARACTERISTICS

Safe working load SWL [kN]	13
Weight of hook without release wire [kg]	3

APPLICATION

The lifting hook type HL13 is included in the rescue equipment installed on board the sea-going vessels and is intended to perform the following operations:

- hoisting of rescue boat on the davit,
- release of a rescue boat from davit sling after launching onto water.

CONSTRUCTION

The design of the hook meets the requirements of the following rules:

- International Convention on Safety of Life at Sea SOLAS-74, Chapter III with amendments,
- issued by marine Classification Societies.
